SOS Piste Rescue Service – Piste assistants  
The local rescue service is operated by 30 well trained full-time members. Please note that, when accidents occur, a fee has to be charged for the rescue service provided. Under local authority regulations, there is always a reason for closure of trails after operating hours.

**PISTE GROOMING:**  
Night after night 40 piste machines and an experienced team set to work on the pistes to ensure perfect snow cover. Despite preparation, if there has been a great deal of snow, it is not always possible to create ideal piste conditions because in some weather conditions the new snow fails to bond with the snow layer underneath. Our team tries, nonetheless, to create the best possible conditions for you.

Beyond the marked slopes you are in off-piste skiing areas. **BWARE OF ALPINE DANGERS!**

- Please heed all signs, warnings and closures, especially when there is any danger of avalanches.
- Prepared and monitored pistes (colour according to piste rating)
- Sign denoting piste edge (colour according to piste rating)
